CODE-ON-VIBES

An Agentic AI Personal Teacher

An intelligent learning system that adapts to individual learning styles, difficulty levels, and time constraints.

Unlike traditional platforms that deliver static content, our system behaves like a real teacher. It understands user input conversationally, generates personalized lessons dynamically, delivers multi-modal learning (text, visual, audio), evaluates performance, and proactively guides learners.

The solution transforms one-size-fits-all education into a personalized, adaptive learning ecosystem.
